The new and unique command from 4box

UNIKO HAS FOUR FUNCTIONS

One-way Switch, Intermediate switch and push-button, all in one control. Uniko is the new intelligent solution from 4box, compatible with the main civil series, which allows the four types of control to be realised depending on how the cables are connected in the terminals on the back.

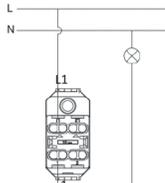

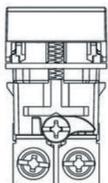

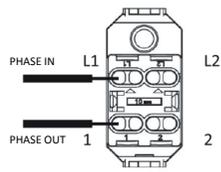

PUSH-BUTTON: ACTIVATION AND DEACTIVATION

An innovative mechanism for engaging and disengaging the spring inside the switch, using a standard Phillips or slotted screwdriver, lets you use Uniko as a rocker switch or as a push-button. Everything is easy, quick and safe!
